

MD-OS APFC — artificial prefrontal cortex
evidence · context · policy · coordination

SENSORY EVIDENCE

Vision
camera, depth

Audio
microphones

Touch / force
tactile, torque

Proprioception
pose, velocity

Telemetry
battery, faults

ALLOW · CONFIRM · BLOCK · UNCERTAIN

MECHANICAL CHANNELS

Speech / display
communication

Arms / grippers
motion, grasp

Tools / device I/O
interfaces

Locomotion
wheels, legs

HARD AUTHORITY BOUNDARY

Independent safety + real-time controller
interlocks, limits, collision envelope, emergency stop

observed consequences return through the sensory loop
